Title and abstract of the doctoral thesis (within 150 words)
TÜRKİYE TÜRKÇESİ İLE KAZAK TÜRKÇESİNİN SÖZ DİZİMİ BAKIMINDAN KARŞILAŞTIRILMASI (Comparison of Syntax of Kazakh and Turkish Languages)

Syntax is the part of language which studies word groups, types of sentences and relation between words in a sentence. Considering that language is alive, it is natural for a language having tendency to improve and change. But this process occurs very slowly in syntax which has more stable structure according to other parts of a language.

The factors like being literary and in relationship with other languages as well as the natural improvement of a language have great importance in the development of syntax which means the arrangement of the word in a sentence.

In this research Turkish and Kazakh languages which have the same structure are syntactically compared and the same, similar and different structures are distinguished. Also, some changes in the syntactic structure of these languages are determined which occur as a result of a contact with other languages of different syntactic structure.
